Applicant's election the species of Figure 2 with traverse has been acknowledged. However, such election is treated without traverse because applicant has failed to distinctly and specifically point out why the grouped species are not patentably distinct. However, if applicant positively admits that the grouped species are not patentably distinct, such election would be withdrawn.

Claims 1-8,14-17 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. For example: claims 1-8, 14-17 are not readable on elected species of figure 2. Figure 2 does not show any drum with outer wall and outer wall connected by shear resistant connection. There is no description of any drum in the specification relating to Figure 2. There are two devices in figure 2 . How do parts 1 and 2 transform to become the device of parts 3 and 4. What are the parts of 1,2,3,and 4?

The drawing is objected to as failing to show the claimed subject matter.
